

Core Features

USER MONITOR II

About

User Monitor is an essential enhancement to Gossamer Threads Links SQL directory script. With User Monitor (UM) you will be able to instantly add a full monitoring, user directory, user profiling, reward and tool system to your web site. Your community of users will enjoy the interactivity and features that UM brings, and you (the webmaster) will begin enjoying the features you could not do with out for site management.

Core Features

User monitor is packed with feature ready to use. Here are just some of them:

User Tracking System

- Logins – date, time, totals (monthly and grand)
- User since date – automatic recording
- Reward based activity

User Reward System

- Reward by user
- Reward all users
- Reward users with a certain status
- Last deposit date for each user

User Directory

- Directory listing all users in your Links community
- Automatically generated links to each user's profile page
- Automatically generated links to an editor's profile page*

User Profile Pages

- Static HTML and dynamically created user profile pages
- Profile pages can be modified by the user
- Email notification to the administrator for profile updates
- Profile pages include user's name, bio, email, web Sites and user Images

Statistics and Other

- Monthly and total statistics
- Admin definable user status
- Who's online – see which of your user's are currently logged in

Requirements

- Gossamer Threads Links SQL version 2.1.0 or newer
- Optional: Editor Monitor Plugin. This adds additional functions.

*Requires Editor Monitor Plug-In
